

CIMOn Aasia-ohjelmasta 2015 tuetut Kiina-hankkeet

CIMO Asia programme funded China projects 2015

Project title: Cleantech in Cold Regions - joint research and education	
Coordinator Aalto University Department of Civil and Environmental Engineering Riku Vahala riku.vahala@aalto.fi	Harbin city is the capital city of Heilongjiang province of China, which is located in the northeastern part of the country. Heilongjiang is in the northernmost and one of the coldest regions of China. With similar climate, natural conditions and environmental challenges, this region is close to Finland. Therefore there are joint research interests and a lot of cooperation possibilities. The aim of the project is to set up a concept for educational cooperation available for students of both universities. With Asia funding joint teaching efforts for short term intensive courses could be provided for students as well as MSc thesis opportunities and workshops for students and faculty. The project plan consist of two main parts: for developing and realizing joint courses and for networking (including R&D&I model development with industry).
Partners Harbin Institute of Technology, China Finnish Water Forum The University of Turku Biomedical and Environmental ICT Research Group
